

First 5 Mono Parenting Partners report – March 11, 2013

We continue to broaden our outreach; pamphlets have been distributed through the schools, Peapod Playgroups, the Inter-Agency Coordinating Council, and Pediatrics offices. We are conducting personalized case management to tailor visits to the specific needs of each family. Fifteen of the 25 families referred have received home visits. We have not yet been able to schedule a visit with the remaining 10. We have provided 87 home visits. Referrals came from: Early Start, Welcome Baby!, Mammoth Hospital, Peapod Playgroups, CPS, and self-referrals. The families' high needs include: teen parents, developmental delays, guardian support (living with a parent), high stress, unstable environment, and parenting challenges. We have served families in Benton, Bridgeport, Chalfant, Crowley and Mammoth.
